WEEK-1

1. Visit BSEIndia.com and NSEIndia.com and analyze the graphs of BSE SENSEX 50 and BSE BANKEX.

Procedure

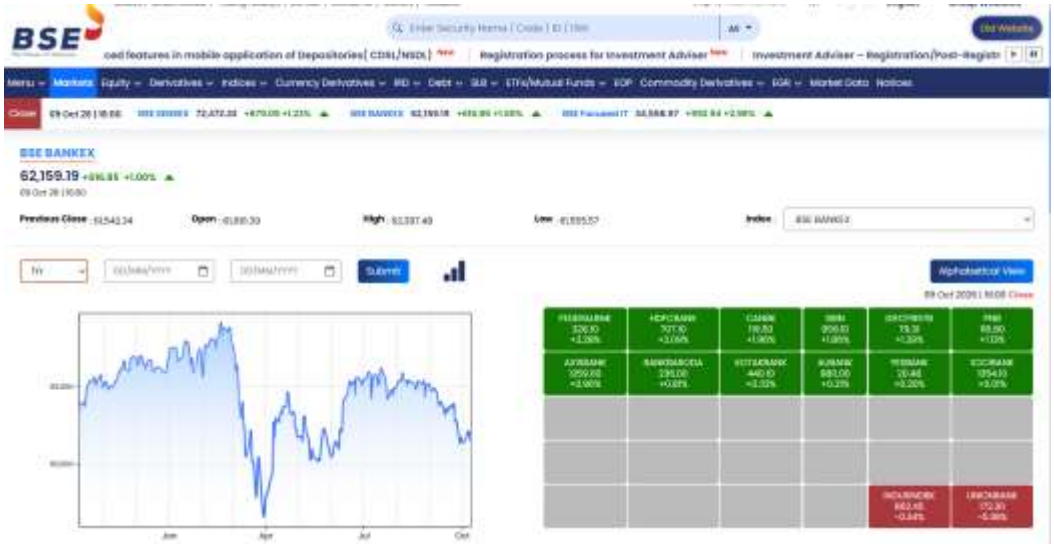

Part A: Analysis of BSE SENSEX 50

1. Open the official website of the Bombay Stock Exchange (BSE): https://www.bseindia.com/markets.html
2. Navigate to the Indices section.
3. Locate **BSE SENSEX 50** under the Market Cap/Broad section.
4. Open the index page and examine its price graph.
5. Observe the index value, changes in price, overall trend, and fluctuations over the selected time period.
6. Note the major upward and downward movements in the graph.

Part B: Analysis of BSE BANKEX

1. Open the BSE BANKEX index page: https://www.bseindia.com/sensex/code/53/
2. Examine the BANKEX index graph and the banking stocks represented in the index.
3. Observe the changes in the index value over the selected period.
4. Identify upward trends, downward trends, and periods of high or low volatility.
5. Compare the behavior of BANKEX with that of BSE SENSEX 50.

Part C: Analysis using NSE India

1. Open the official National Stock Exchange (NSE) website: https://www.nseindia.com/
2. Navigate to the Indices section and locate the relevant available indices.
3. Examine the corresponding index graphs and historical movements.
4. Compare the observed market trends and fluctuations with those on the BSE website.

Analysis and Interpretation

a. BSE SENSEX 50

BSE SENSEX 50 is a stock market index representing 50 major companies selected according to the index's constituent-selection methodology. It provides an overview of the performance of a broad group of leading companies in the Indian equity market.

The graph can be analyzed using the following observations:

- **Upward movement:** Indicates an increase in the index value and generally reflects positive price performance among its constituents.

- **Downward movement:** Indicates a decrease in the index value and reflects negative price performance.
- **Volatility:** Frequent or large fluctuations indicate greater short-term variability in index values.
- **Trading trend:** Sustained upward or downward movement helps identify the prevailing market direction over the selected period.

b. BSE BANKEX

BSE BANKEX is a sectoral index that tracks the performance of selected banking stocks. It helps assess the performance of the banking sector in the Indian equity market.

The graph can be analyzed using the following observations:

- **Upward trend:** May indicate positive performance among banking constituents.
- **Downward trend:** May indicate weakness in banking stocks.
- **Volatility:** Changes in the index may reflect shifts in investor expectations, interest-rate outlook, credit conditions, and banking-sector developments.
- **Sector performance:** BANKEX can be compared with a broader market index to understand whether banking stocks are performing relatively better or worse.

c. Comparison of BSE SENSEX 50 and BSE BANKEX

BSE SENSEX 50 represents a broader group of companies, whereas BSE BANKEX focuses specifically on the banking sector. Comparing their graphs helps identify whether banking-sector movements follow the broader market or differ from it.

A simultaneous rise in both indices may indicate broad positive market sentiment. If BANKEX rises while SENSEX 50 falls, or vice versa, it may indicate a difference between banking-sector performance and the wider market.

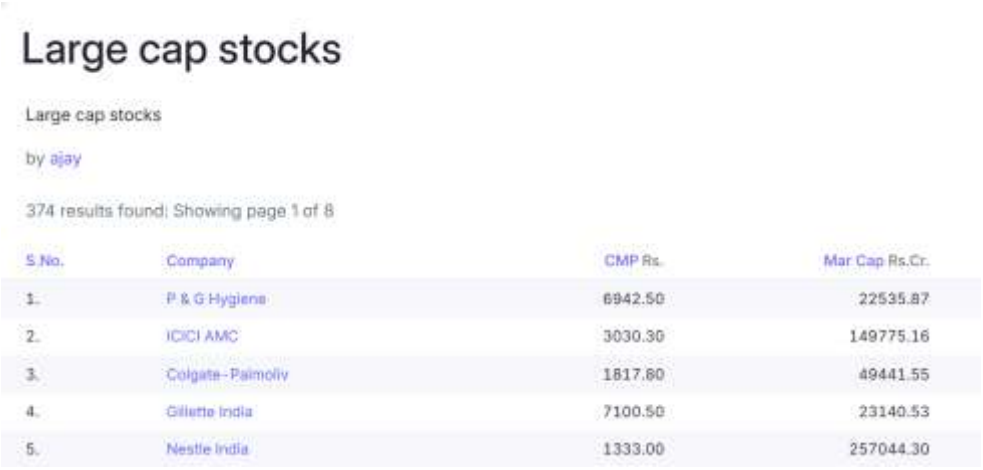

Result

The graphs of BSE SENSEX 50 and BSE BANKEX were examined using the official BSE and NSE websites. The analysis helps understand overall market movements, banking-sector performance, price trends, and volatility. Comparing the indices provides insight into the relationship between broad-market performance and sector-specific performance.

2. Identify Large-Cap, Mid-Cap, and Small-Cap Companies Based on Market Capitalization in Screener.in.

Procedure

1. Open the website https://www.screener.in/.
2. Navigate to the stock screening section to explore companies based on their market capitalization.
3. Open the following screens to view companies belonging to different market-cap categories:
    - **Large-Cap Companies:** https://www.screener.in/screens/302724/large-cap-stocks/

5. Identify companies where FII holdings have increased and note their names:
    a) MTAR Technologies Ltd.
    b) Cupid Ltd.
    c) Apollo Microsystems Ltd.
    d) Senores Pharmaceuticals Ltd.
    e) GNG Electronics Ltd.
6. Visit https://www.moneycontrol.com/ or https://www.nseindia.com/ to examine available FII activity and investment data.

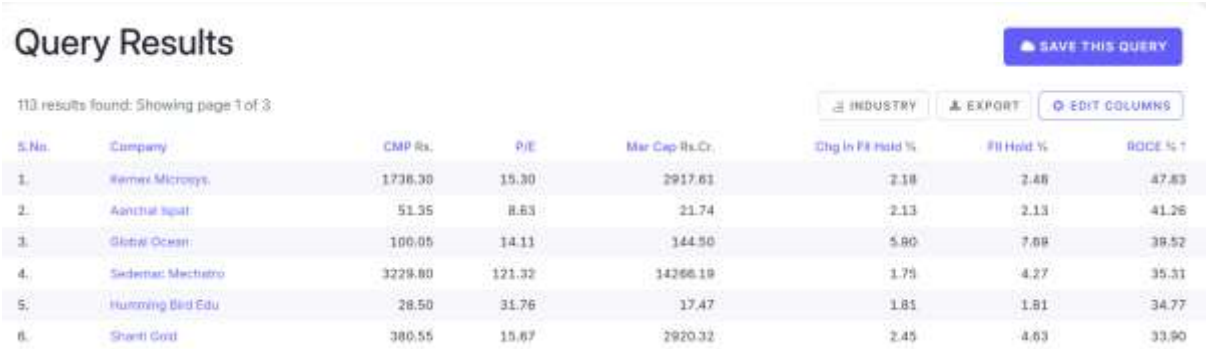

4. Write a query on Change in FII holding greater than 1% AND (FII holding – Change in FII holding) less than 5% in Screener.in.

Procedure

1. Visit https://www.screener.in/ and log in if required.
2. Click **Screens** and select **Create New Screen**.
3. Enter the following query in the query editor:

   Change in FII holding > 1 AND

   (FII holding - Change in FII holding) < 5
4. Click **Run Query** to display the matching companies.
5. Observe the company names, FII holding, and change in FII holding.

5. Write a query on Market Capitalization > 500 AND Price to Earning < 15 AND Return on Capital Employed > 22% in Screener.in.

Procedure

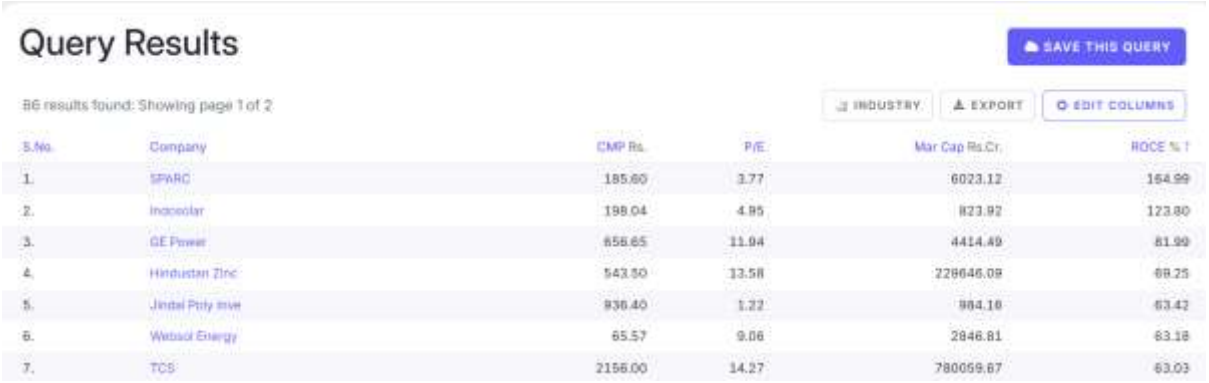

1. Visit https://www.screener.in/.
2. Navigate to **Screens → Create New Screen**.
3. Enter the following query:

4. Market capitalization > 500 AND

   Price to earning < 15 AND

   Return on capital employed > 22

5. Click **Run Query** to display the matching companies.
6. Observe the company names, market capitalization, P/E ratio, and ROCE values.

7. Analyze the Stock Heat Map in TradingView.com.

Procedure

1. Visit https://www.tradingview.com/heatmap/stock/.
2. Open the Stock Heatmap.
3. Select the required market or index, where available.
4. Choose **Market Capitalization** for tile size and **Change %** for tile color.
5. Group the stocks by sector to compare the performance of different industries.
6. Observe the colors and sizes of the tiles to identify stocks with positive or negative price changes and companies with larger or smaller market capitalizations.
7. Click individual tiles to examine stock-specific information.

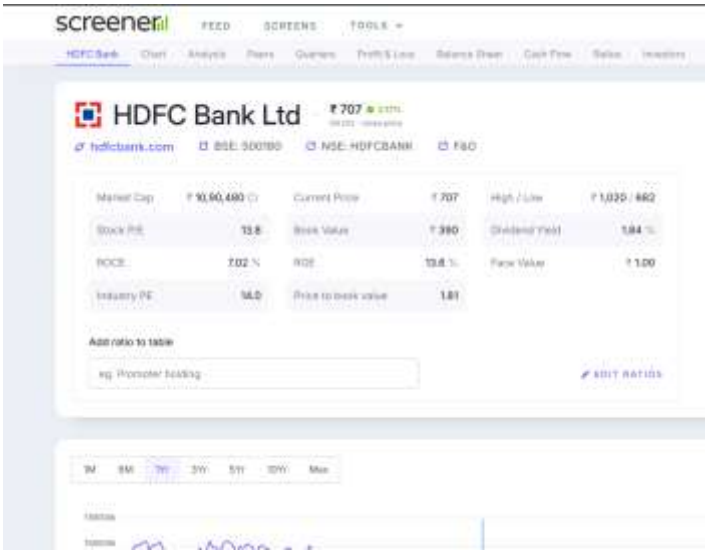

WEEK-2

WEEK 2

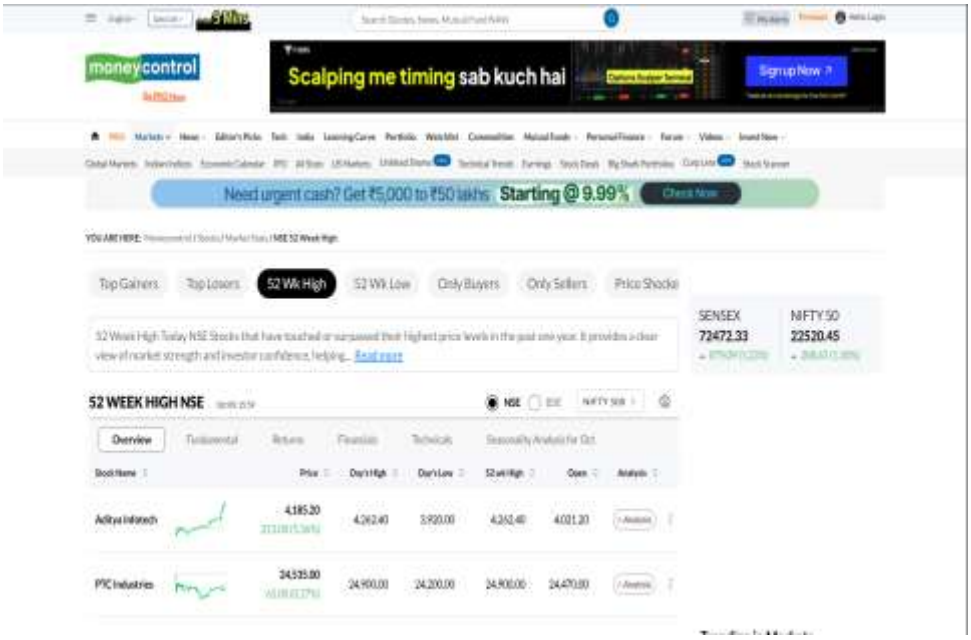

1. Browse about Screener.in, Moneycontrol.com, SGX Nifty, InvestorGain.com, MarketWatch.com, Tickertape.in, TradingView.com, Scanners.Streak.com, Trendlyne.com and Chartink.com.

Procedure

1. Open each website and explore its available financial information and analysis tools.
2. Browse **Screener.in** for company financial statements, ratios and custom stock screens.

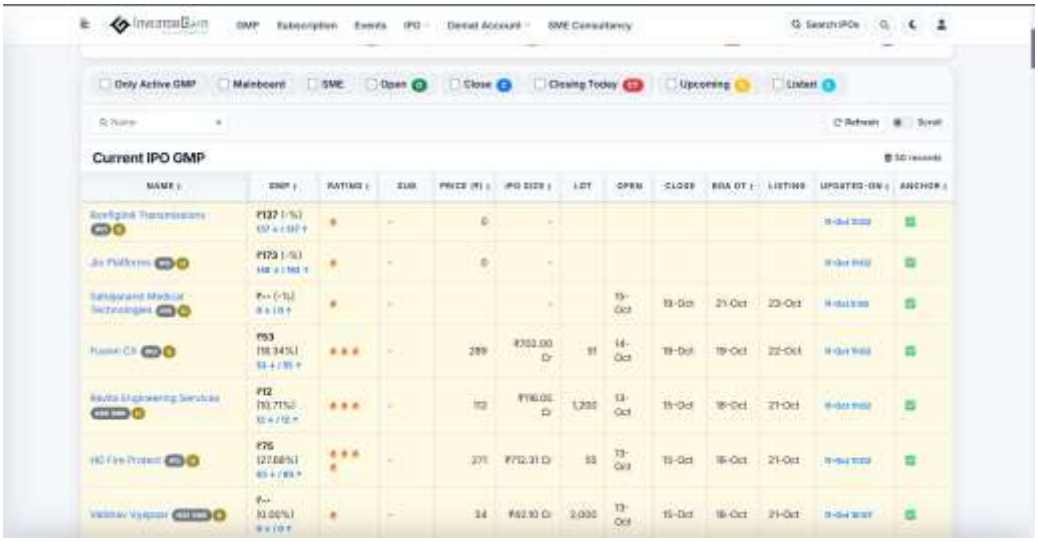

3. Browse **Moneycontrol.com** for stock prices, company news and market updates.

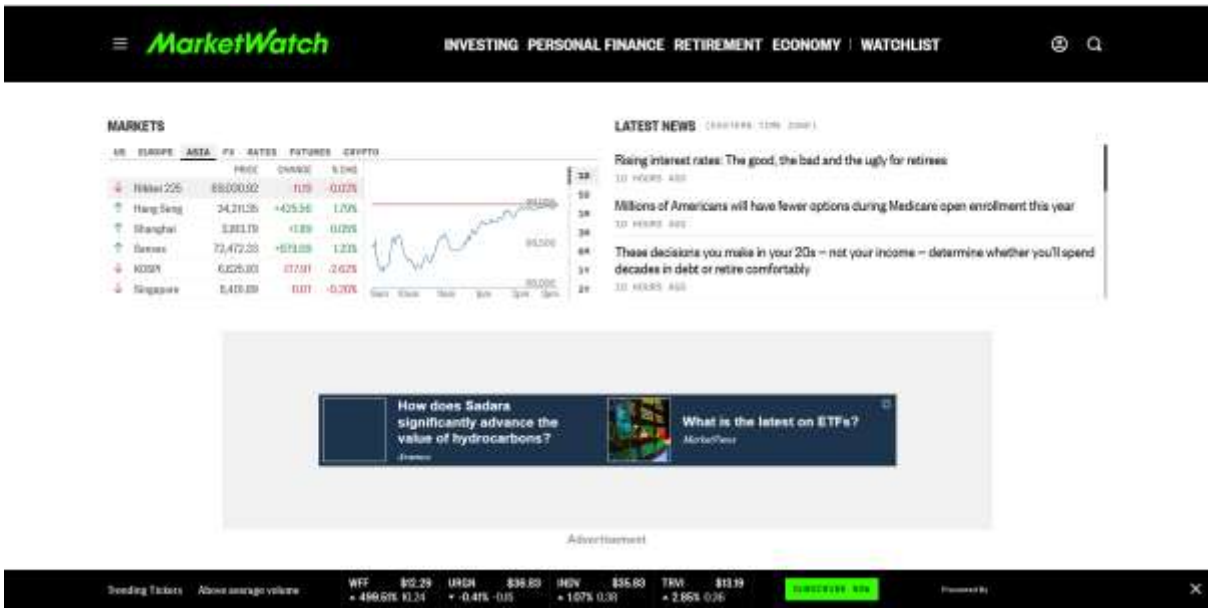

4. Explore **SGX Nifty** or its relevant successor market-index information to understand how it is used to track market sentiment.

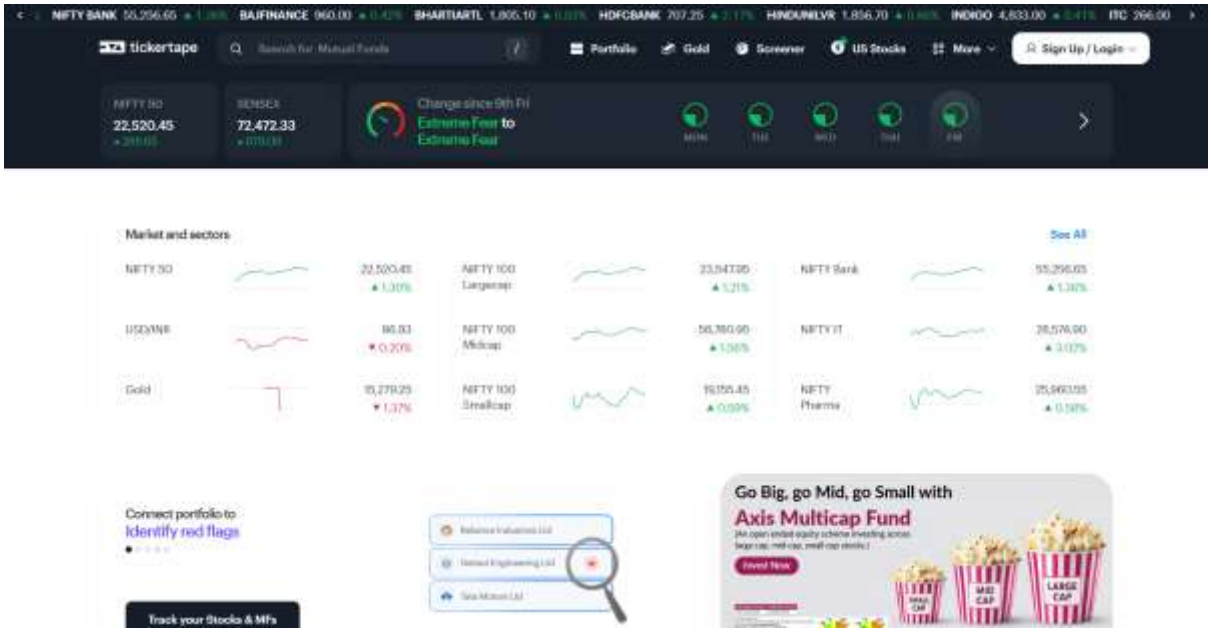

5. Explore **InvestorGain.com** for IPO-related information, market data and other available financial tools.

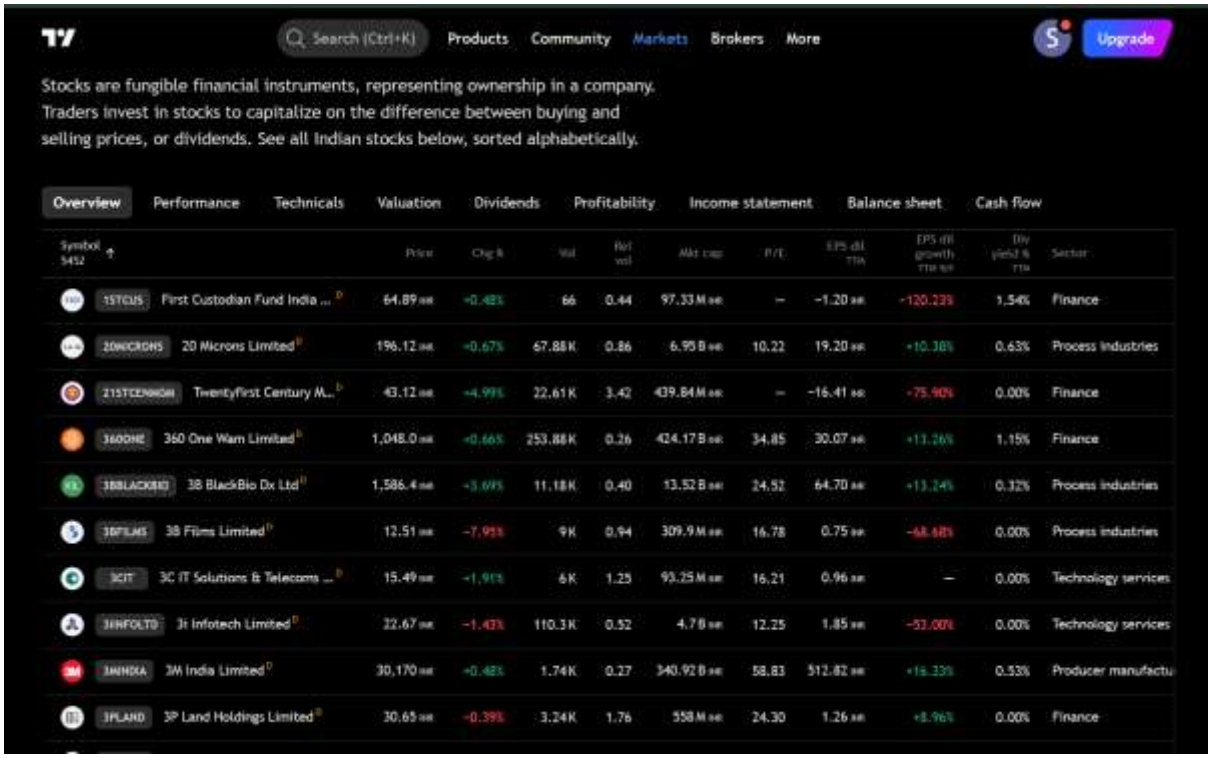

6. Visit **MarketWatch.com** to examine global market news, indices and stock charts.

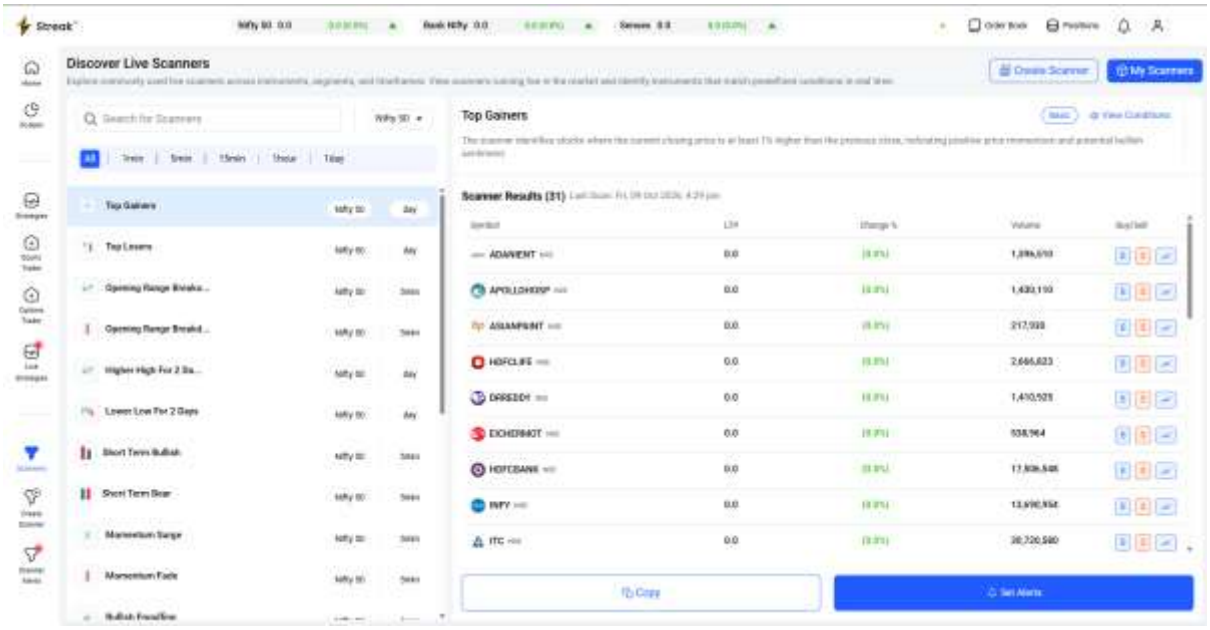

7. Explore **Tickertape.in** for stock analysis, financial metrics and stock-screening tools.

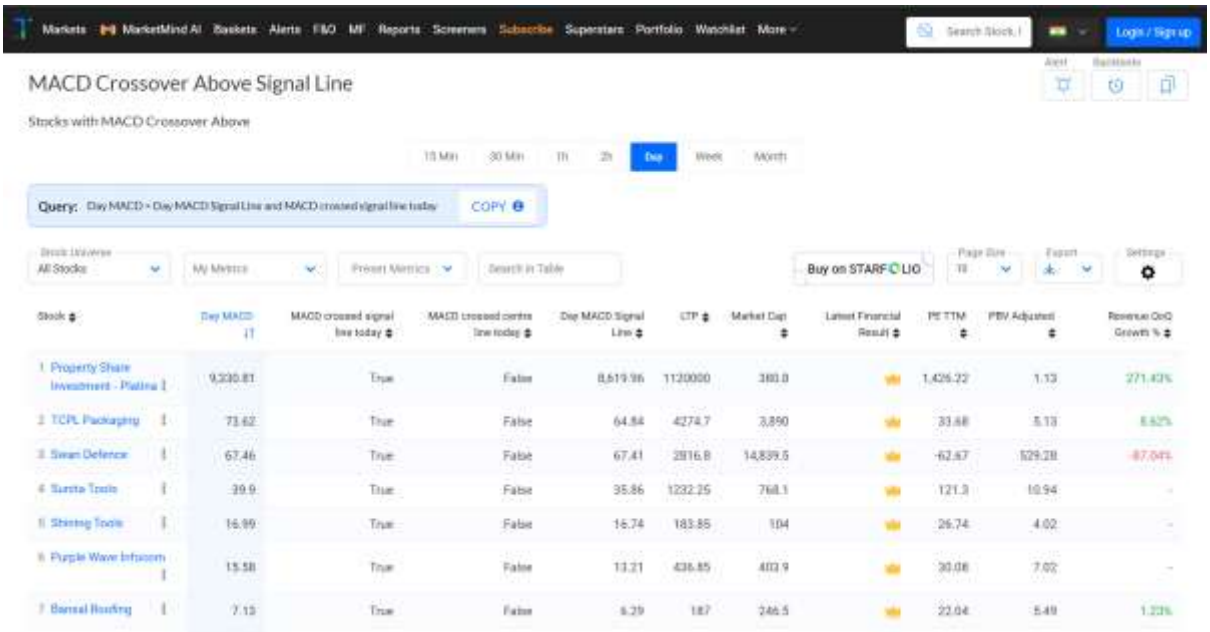

8. Visit **TradingView.com** to study price charts, technical indicators and market heat maps.

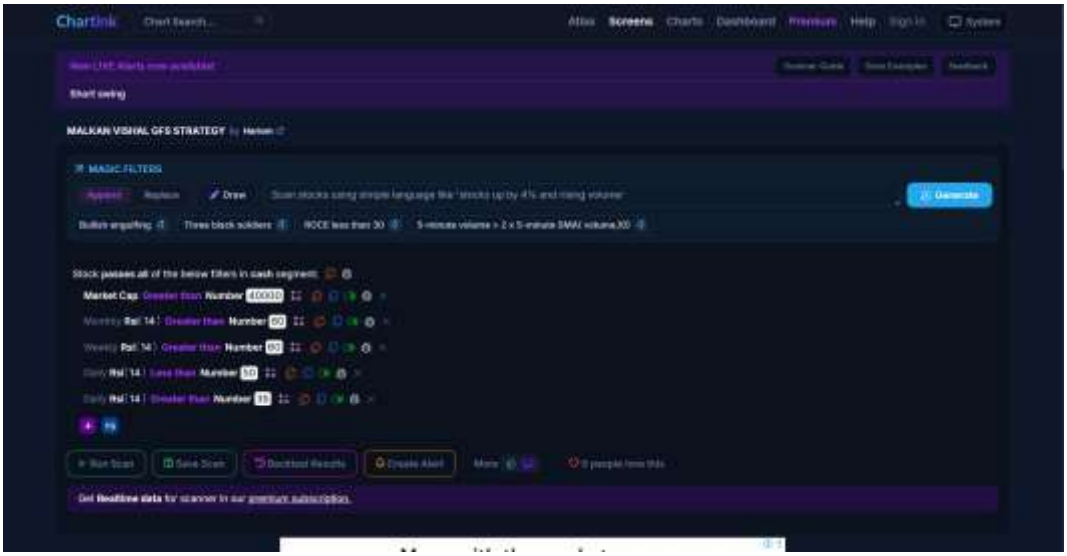

9. Explore **Scanners.Streak.com** for technical-analysis scans and strategy tools.

10. Visit **Trendlyne.com** to examine stock screeners, financial ratios and technical indicators.

11. Explore **Chartink.com** to understand how technical stock scans can be created using multiple conditions.

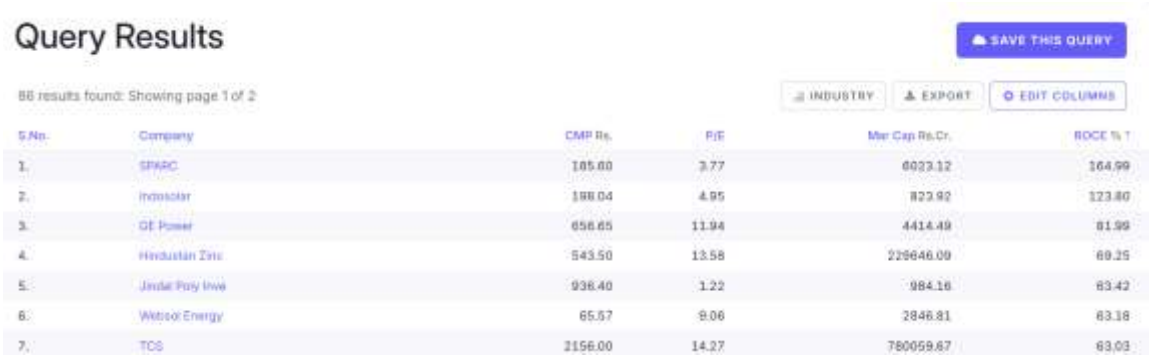

2. Write a query on Market Capitalization > 500 AND Price/Earning < 15 AND ROCE > 22% in Screener.in.

Procedure

1. Open https://www.screener.in/ and navigate to **Screens → Create New Screen**.
2. Enter the following query in the query editor:

   Market capitalization > 500 AND Price to earning < 15 AND Return on capital employed > 22%
3. Click **Run this Query**.
4. Observe the companies satisfying all three conditions.
5. Examine the market capitalization, P/E ratio and ROCE of the resulting companies.

3. Write a query on Market Capitalization / Average Earnings 10Year < 15 AND Average dividend payout 3years > 20 AND Debt to equity < 0.2 AND Average return on capital employed 7Years > 20 in Screener.in.

Procedure

1. Open https://www.screener.in/ and navigate to **Screens → Create New Screen**.
2. Enter the following query:

   Market Capitalization / Average Earnings 10Year < 15 AND Average dividend payout 3years > 20 AND Debt to equity < 0.2 AND Average return on capital employed 7Years > 20
3. Click **Run this Query**.
4. Observe the companies satisfying the specified valuation, dividend payout, debt and long-term ROCE conditions.
5. Examine the results and verify the displayed financial ratios.
6. If the query editor rejects a field name or expression, check **All Ratios** and use the exact field names supported by Screener.in.

4. Analyze the price chart for 1 month, 6 months, 1 year, 3 years, 5 years and 10 years, with price on NSE, 50 DMA, 200 DMA and volume in Screener.in for large-cap, mid-cap and small-cap companies.

Procedure

1. Open https://www.screener.in/ and select a company for analysis.
2. Identify one large-cap, one mid-cap and one small-cap company using the available market-cap information.
3. Open the selected company's stock page and locate its price chart.
4. Select the **NSE** price data, where the exchange option is available.
5. Analyze the chart over the following periods:

   1 month, 6 months, 1 year, 3 years, 5 years, 10 years

6. Display or inspect the **50-day moving average (50 DMA)** and **200-day moving average (200 DMA)**, where supported.

WEEK-3

1. Write a query on YOY Quarterly Sales Growth > 15 AND YOY Quarterly Profit Growth > 20 AND Net Profit Latest Quarter > 1 in Screener.in.

Procedure

1. Open https://www.screener.in/ and navigate to **Screens → Create New Screen**.
2. Enter the following query in the query editor:

   YOY Quarterly Sales Growth > 15 AND YOY Quarterly Profit Growth > 20 AND Net Profit latest quarter > 1
3. Click **Run this Query**.
4. Observe the companies satisfying all three conditions.
5. Verify the quarterly sales growth, quarterly profit growth and latest-quarter net profit of the resulting companies.

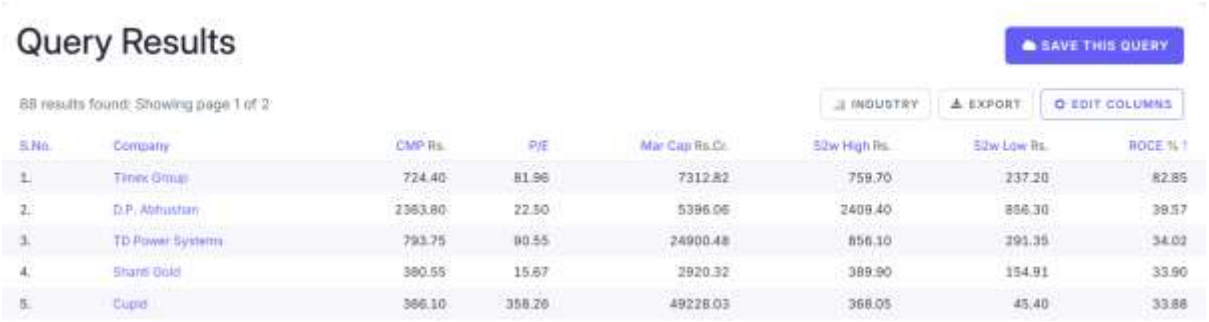

2. Write a query on 100 × ((High Price − Current Price) / High Price) < 10 AND 100 × ((High Price − Current Price) / High Price) > 0 AND 100 × (Current Price / Low Price − 1) > 100 AND Current Price > 10 AND Volume > 100000 in Screener.in.

Procedure

1. Open https://www.screener.in/ and navigate to **Screens → Create New Screen**.
2. Enter the following query in the query editor:

   100 * (High price - Current price) / High price < 10 AND 100 * (High price - Current price) / High price > 0 AND 100 * (Current price / Low price - 1) > 100 AND Current price > 10 AND Volume > 100000
3. Click **Run this Query**.
4. Observe the companies matching the specified price, high-low range and volume conditions.
5. Verify the current price, high price, low price and volume for the resulting companies.

3. Analyze sales and margin charts for 1 month, 6 months, 1 year, 3 years, 5 years and 10 years, with price on NSE, 50 DMA, 200 DMA and volume in Screener.in for large-cap, mid-cap and small-cap companies.

Procedure

1. Open https://www.screener.in/ and select one large-cap, one mid-cap and one small-cap company.
2. Open each company's page and locate the available financial charts.
3. Analyze the **sales and profit margin charts** for the following periods:

   1 month, 6 months, 1 year, 3 years, 5 years, 10 years
4. Open the stock price chart and select NSE price data, where available.
5. Examine the trading volume and note significant changes alongside price movements.
6. Compare sales growth and profit margins across the selected companies and time periods.
7. Record the major trends and differences for large-cap, mid-cap and small-cap companies.

Large Cap – HDFC Bank Ltd.

Mid Cap – Suzlon Energy Ltd.

Small Cap – PC Jeweller Ltd.

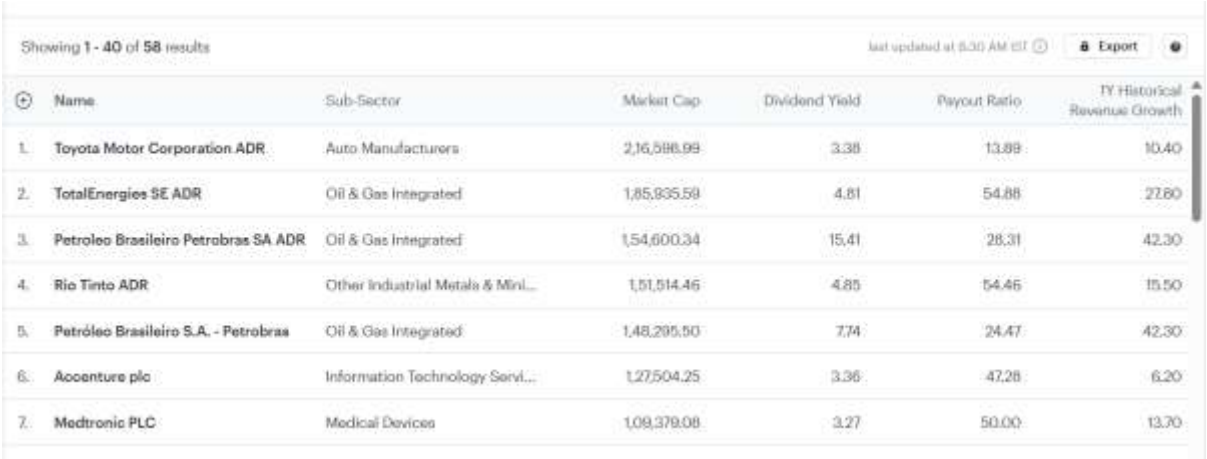

WEEK-4

1. Browse sector and market capitalization in the stock universe of Tickertape.in.

Procedure

1. Open https://www.tickertape.in/.
2. Navigate to the **Stocks** section or stock screener.
3. Explore the available stock universe and sector classifications.
4. Examine the market capitalization of listed companies.
5. Identify companies belonging to large-cap, mid-cap and small-cap categories.
6. Record the sector and market capitalization of selected companies.

6. Analyze the P/E ratio chart for 1 month, 6 months, 1 year, 3 years, 5 years and 10 years, with price on NSE, 50 DMA, 200 DMA and volume in Screener.in for large-cap, mid-cap and small-cap companies.

Procedure

1. Open https://www.screener.in/ and select one large-cap, one mid-cap and one small-cap company.
2. Open each company's page and locate the available valuation and stock charts.
3. Examine the P/E ratio chart for the following periods:

   1 month, 6 months, 1 year, 3 years, 5 years, 10 years
4. Open the stock price chart and select NSE price data, where available.
5. Observe the 50-day moving average (50 DMA) and 200-day moving average (200 DMA), where supported.
6. Examine trading volume and note significant changes in price and valuation.
7. Record the P/E ratio trend and compare it with the stock's price movement over the available periods.
8. Repeat the analysis for all three market-cap categories.
9. Capture screenshots of the P/E ratio and stock charts.

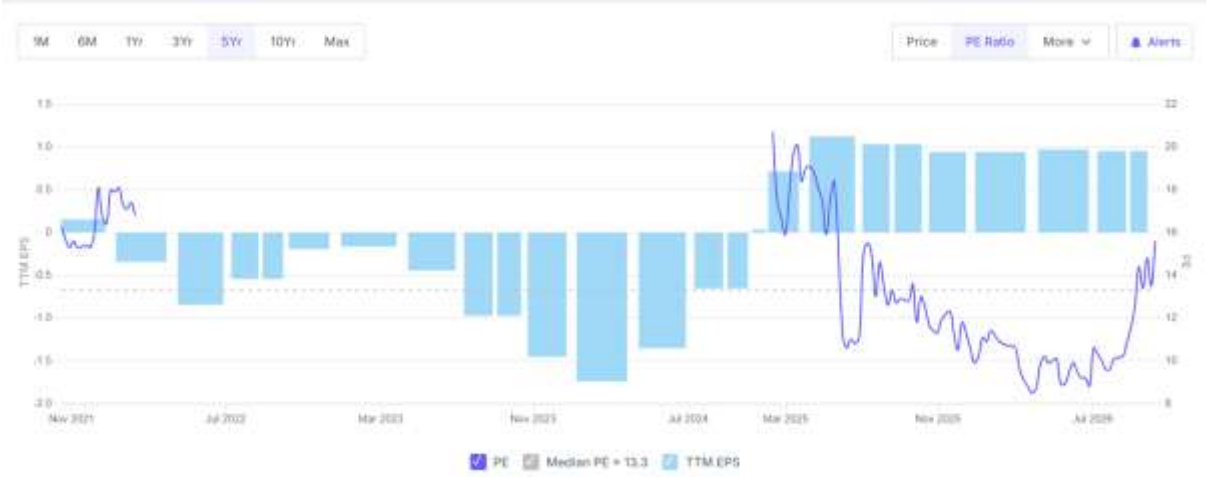

Large Cap: HDFC Bank Ltd.

Mid Cap – Suzlon Energy Ltd.

Small Cap – PC Jeweller Ltd.

WEEK-5

1. Check technical indicators, income statement, balance sheet and cash flow statement analysis for small-cap, mid-cap and large-cap companies with respect to closing price and P/E ratio.

Procedure

1. Open https://in.tradingview.com/ and navigate to the stock overview.
2. Select one large-cap, one mid-cap and one small-cap company.
3. Open each company's stock details page.
4. Examine the available **technical indicators**, such as moving averages, RSI and other displayed indicators.
5. Review the **income statement** to observe revenue, expenses, operating profit and net profit.
6. Review the **balance sheet** to examine assets, liabilities, equity and debt.
7. Review the **cash flow statement** to observe operating, investing and financing cash flows.
8. Record the closing price and P/E ratio of each selected company.
9. Compare the financial statements and technical indicators across the three market-cap categories.

Small Cap:

2. Analyze the EV/EBITDA chart for 1 month, 6 months, 1 year, 3 years, 5 years and 10 years, with price on NSE, 50 DMA, 200 DMA and volume in Screener.in for large-cap, mid-cap and small-cap companies.

Procedure

1. Open https://www.screener.in/ and select one large-cap, one mid-cap and one small-cap company.
2. Open each company's page and locate the available valuation and stock charts.
3. Examine the **EV/EBITDA ratio** over the following periods, where data is available:

   1 month, 6 months, 1 year, 3 years, 5 years, 10 years
4. Open the stock price chart and select NSE price data, where available.
5. Observe the **50-day moving average (50 DMA)** and **200-day moving average (200 DMA)**, where supported.
6. Examine trading volume and note significant changes in price and valuation.
7. Record the EV/EBITDA trend and compare it with the stock's price movement.
8. Repeat the analysis for all three market-cap categories.

WEEK-6

1. Identify candlestick charts in Chartink.com for small-cap, mid-cap and large-cap companies.

Procedure

1. Open https://chartink.com/ and navigate to the stock screener.
2. Select stocks belonging to the large-cap, mid-cap and small-cap categories.
3. Choose a company from each category and note its name and market capitalization.
4. Open the selected stock's chart, where available.
5. Identify the candlestick chart and observe the open, high, low and closing prices represented by each candle.
6. Observe bullish and bearish candles and note the price movements over the selected period.
7. Repeat the procedure for large-cap, mid-cap and small-cap companies.

Large Cap – HDFC Bank Ltd.

Mid Cap – Suzlon Energy Ltd.

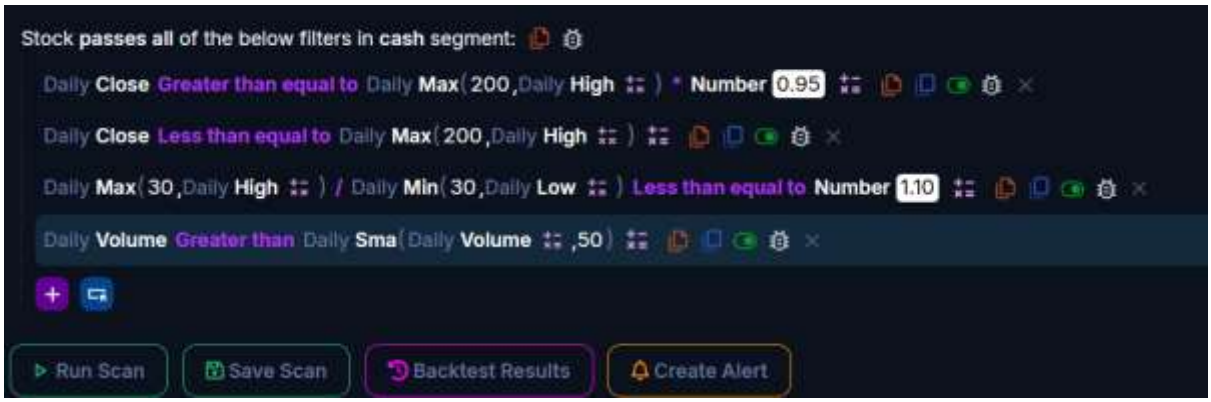

Small Cap – PC Jeweller Ltd.

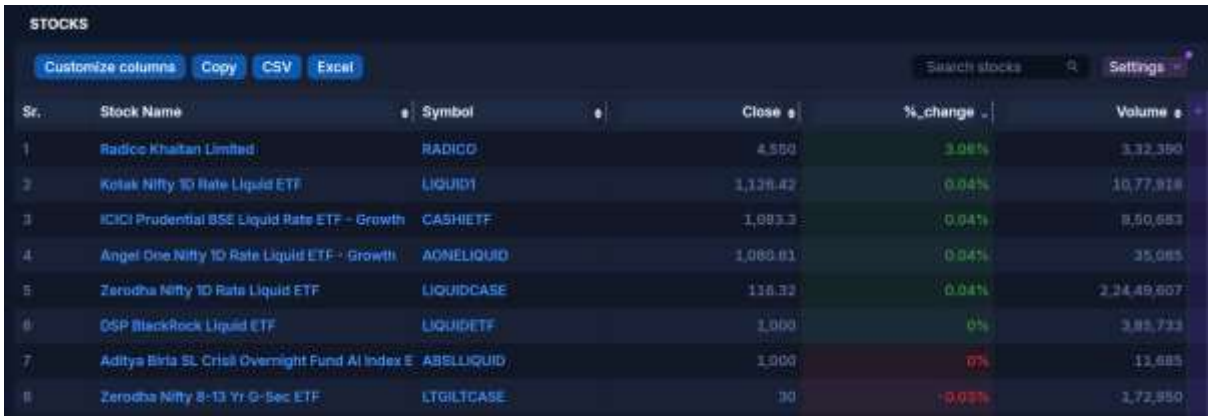

2. Write a query on stocks nearing their 200-day high by 5%, showing consolidation for the past 30 days, with volume above the 50-day average.

Procedure

1. Open https://chartink.com/ and navigate to the stock screener.
2. Create a new scan and add conditions to identify stocks trading within 5% of their 200-day high.
3. Add conditions to identify stocks showing consolidation over the past 30 days.
4. Add a volume condition requiring current volume to be greater than its 50-day average.
5. Use the following logical conditions as a guide:
    - Current price is at least 95% of the 200-day high.
    - Price movement over the past 30 days is within a defined consolidation range.
    - Current volume is greater than the 50-day average volume.
6. Run the scan and observe the stocks satisfying the conditions.
7. Review the resulting charts to verify proximity to the 200-day high, consolidation and volume conditions.

WEEK-7

1. Draw trend lines and identify pivot points of small-cap, mid-cap and large-cap companies in Chartink.com.

Procedure

1. Open https://chartink.com/ and select a company from each market-cap category: large-cap, mid-cap and small-cap.
2. Open the selected company's price chart.
3. Identify significant swing highs and swing lows in the chart.
4. Draw a trend line by connecting two or more significant swing highs or swing lows.
5. Identify pivot points where the price reverses direction after reaching a local high or low.
6. Observe whether the price respects or breaks the trend lines.
7. Repeat the analysis for all three market-cap categories.

Large Cap – HDFC Bank Ltd.

Mid Cap – Suzlon Energy Ltd.

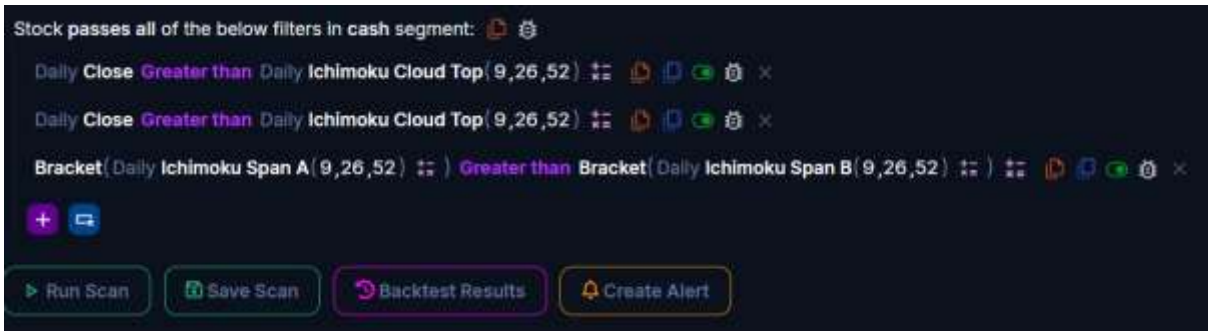

Small Cap – PC Jeweller Ltd.

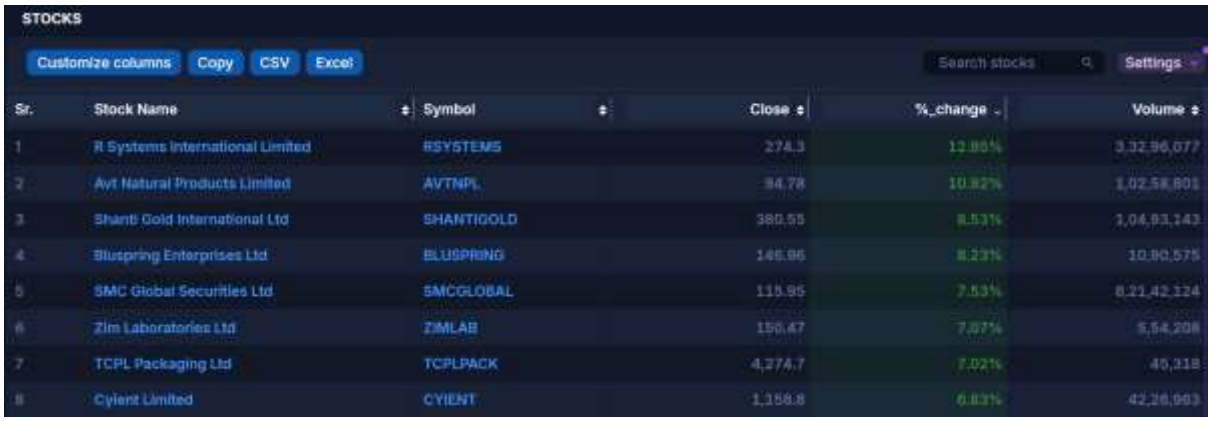

2. Write a query on stocks closing above the Ichimoku cloud, with Span A greater than Span B, indicating a positive trend in Chartink.com.

Procedure

1. Open https://chartink.com/ and navigate to the stock screener.
2. Create a new scan and select the relevant Ichimoku Cloud indicator conditions.
3. Set the conditions to identify stocks whose closing price is above the cloud and whose Span A is greater than Span B.
4. Use the following logical conditions as a guide:
    - Latest closing price is greater than Ichimoku Span A.
    - Latest closing price is greater than Ichimoku Span B.
    - Ichimoku Span A is greater than Ichimoku Span B.
5. Run the scan to obtain the matching stocks.
6. Verify the results by opening individual stock charts and checking the Ichimoku Cloud.

3. Analyze the Price-to-Book (P/B) ratio chart for 1 month, 6 months, 1 year, 3 years, 5 years and 10 years, with price on NSE, 50 DMA, 200 DMA and volume in Screener.in for large-cap, mid-cap and small-cap companies.

Procedure

1. Open https://www.screener.in/ and select one large-cap, one mid-cap and one small-cap company.
2. Open each company's page and locate the available valuation and stock charts.
3. Examine the Price-to-Book (P/B) ratio over the following periods, where historical data is available:

1 month, 6 months, 1 year, 3 years, 5 years, 10 years

4. Open the stock price chart and select NSE price data, where available.
5. Observe the 50-day moving average (50 DMA) and 200-day moving average (200 DMA), where supported.
6. Examine trading volume and note significant changes in price and valuation.
7. Record the P/B ratio trend and compare it with the stock's price movement.
8. Repeat the analysis for all three market-cap categories.

Large Cap – HDFC Bank Ltd.

WEEK-8

1. Identify Hanging Man, Hammer, Bearish Engulfing and Bullish Engulfing patterns for different types of companies in Chartink.com.

Procedure

1. Open https://chartink.com/ and select companies from the large-cap, mid-cap and small-cap categories.
2. Open the price chart of each selected company.
3. Identify the following candlestick patterns:
    - **Hanging Man:** A small real body near the top of the candle with a long lower shadow, usually appearing after an uptrend.
    - **Hammer:** A small real body near the top with a long lower shadow, usually appearing after a downtrend.
    - **Bearish Engulfing:** A bearish candle whose real body engulfs the previous bullish candle's real body.
    - **Bullish Engulfing:** A bullish candle whose real body engulfs the previous bearish candle's real body.
4. Observe the surrounding price trend to help distinguish the Hammer from the Hanging Man.
5. Record the company name, market-cap category and identified pattern.

Small Cap - PC Jeweller Ltd.

Hanging Man:

Small Cap – PC Jeweller Ltd.

Hammer:

Large Cap – Infosys Ltd.

Bearish Engulfing:

Mid Cap – Poonawalla Fincorp Ltd.

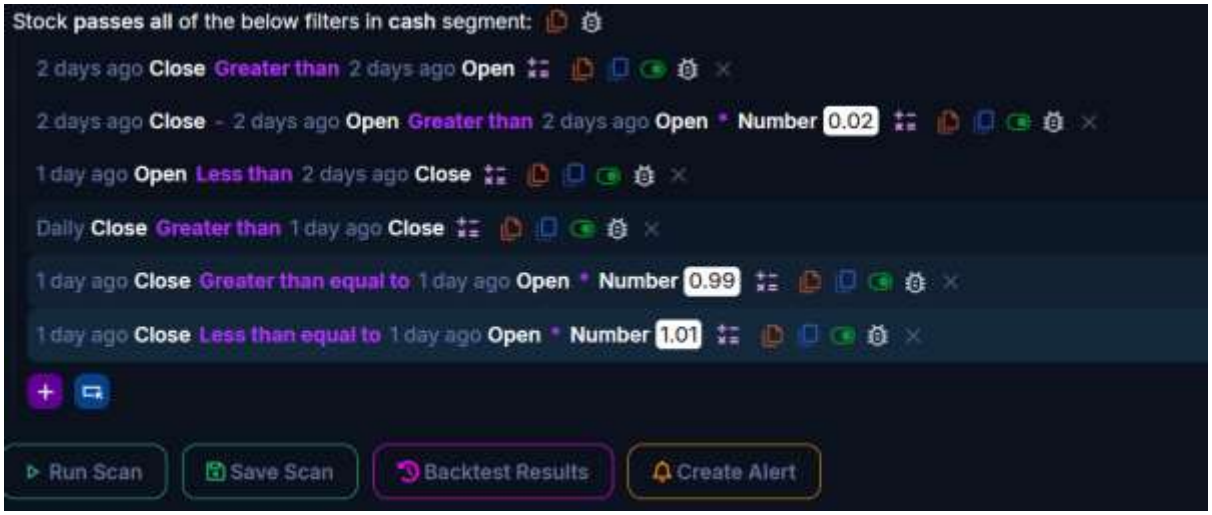

Bullish Engulfing:

2. Write a query on a bullish reversal pattern in which a stock had a long white body two days ago, opened lower with a Doji one day ago and finally closed above the previous day's price.

Procedure

1. Open https://chartink.com/ and navigate to the stock screener.
2. Create a new scan and add conditions to identify the three-candle pattern.
3. Set the conditions as follows:
    - **Two days ago:** A bullish candle with a long white body.
    - **One day ago:** The stock opened below the previous close and formed a Doji candle.
    - **Latest day:** The closing price is above the previous day's closing price.
4. Express the conditions using the appropriate open, close and candle-body indicators supported by Chartink.
5. Run the scan to identify matching stocks.
6. Open the resulting charts and verify whether the candles match the intended bullish reversal pattern.

3. Analyze the Market Capitalization/Sales chart for 1 month, 6 months, 1 year, 3 years, 5 years and 10 years, with price on NSE, 50 DMA, 200 DMA and volume in Screener.in for large-cap, mid-cap and small-cap companies.

Procedure

1. Open https://www.screener.in/ and select one large-cap, one mid-cap and one small-cap company.
2. Open each company's page and locate the available valuation and stock charts.
3. Examine the Market Capitalization/Sales ratio over the following periods, where historical data is available: 1 month, 6 months, 1 year, 3 years, 5 years, 10 years
4. Open the stock price chart and select NSE price data, where available.
5. Observe the 50-day moving average (50 DMA) and 200-day moving average (200 DMA), where supported.
6. Examine trading volume and note significant changes in price and valuation.
7. Record the Market Capitalization/Sales trend and compare it with the stock's price movement.

8. Repeat the analysis for all three market-cap categories.

Large Cap – HDFC Bank Ltd.

Mid Cap – Suzlon Energy Ltd.

Small Cap – PC Jeweller Ltd.

WEEK-9

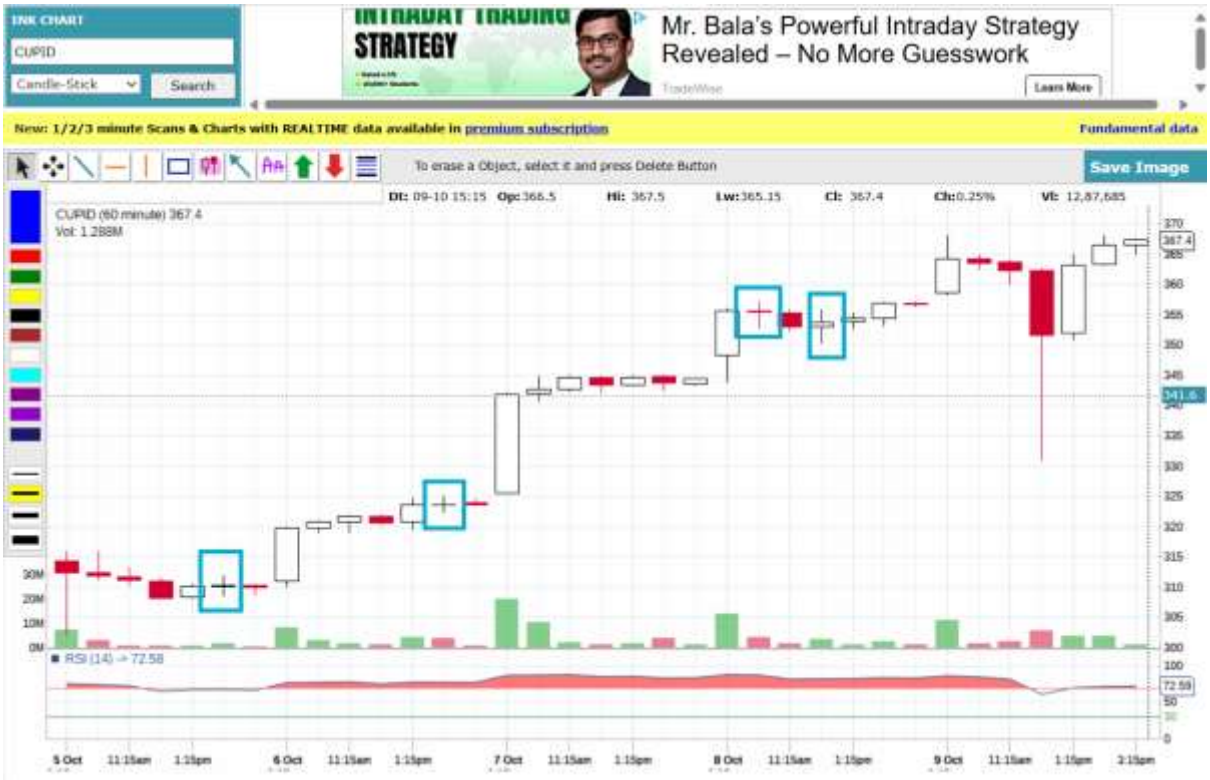

1. Identify Doji and Rising Window candlestick patterns for different types of companies.

Procedure

1. Open https://chartink.com/ and select companies from the large-cap, mid-cap and small-cap categories.
2. Open the price chart of each selected company.
3. Identify the following candlestick patterns:
    - **Doji:** A candle in which the opening and closing prices are nearly equal, resulting in a very small real body.
    - **Rising Window:** A bullish gap in which the low of the current candle is above the high of the previous candle.
4. Observe the surrounding price trend to understand the context of each pattern.
5. Record the company name, market-cap category and identified pattern.
6. Repeat the analysis for different companies.

Mid Cap – Cupid Ltd.

Doji:

Small Cap – PC Jeweller Ltd.

Rising Window Pattern:

2. Analyze the profit and loss statement and balance sheet of a large-cap, mid-cap and small-cap company.

Procedure

1. Open https://www.screener.in/ and select one large-cap, one mid-cap and one small-cap company.
2. Open each company's page and navigate to its **Profit & Loss** statement.
3. Examine sales, expenses, operating profit, interest, tax and net profit over the available financial years.
4. Navigate to the **Balance Sheet** section.
5. Examine assets, liabilities, reserves, borrowings and shareholders' equity.
6. Compare revenue growth, profitability, debt levels and financial position across the three companies.
7. Record the important observations for each company.

Large Cap – HDFC Bank Ltd.

WEEK-10

1. Identify Ascending Channel, Descending Channel, Rectangular Channel and Ascending Triangle patterns in Chartink.com.

Procedure

1. Open https://chartink.com/ and select the stock screener.
2. Select companies from the large-cap, mid-cap and small-cap categories.
3. Open the price chart of each selected company.
4. Identify the following chart patterns:
    - **Ascending Channel:** Price moves upward between two approximately parallel trend lines, forming higher highs and higher lows.
    - **Descending Channel:** Price moves downward between two approximately parallel trend lines, forming lower highs and lower lows.
    - **Rectangular Channel:** Price fluctuates horizontally between approximately parallel support and resistance levels.
    - **Ascending Triangle:** Price forms a relatively horizontal resistance level and a rising support line.
5. Draw trend lines connecting the relevant highs and lows, where charting tools are available.
6. Observe whether the price remains within the pattern or breaks above or below it.
7. Record the company name, market-cap category and identified chart pattern.

Ascending Channel:

Descending Channel:

Rectangular Channel:

Ascending Triangle:

WEEK-11

1. Identify Descending Triangle, Symmetric Triangle, Flag, Pennant, Head and Shoulders, and Cup and Handle patterns in Chartink.com.

Procedure

1. Open https://chartink.com/ and navigate to the stock screener.
2. Select companies from the large-cap, mid-cap and small-cap categories.
3. Open the price chart of each selected company.
4. Identify the following chart patterns:
    - **Descending Triangle:** A relatively horizontal support line with a descending resistance line.
    - **Symmetric Triangle:** Converging trend lines formed by lower highs and higher lows.
    - **Flag Pattern:** A short consolidation channel following a sharp price movement.
    - **Pennant Pattern:** A short, converging consolidation pattern following a sharp price movement.
    - **Head and Shoulders:** Three peaks, with the middle peak higher than the two surrounding peaks.
    - **Cup and Handle:** A rounded, cup-shaped price recovery followed by a smaller consolidation called the handle.
5. Draw trend lines around the relevant highs and lows, where charting tools are available.
6. Observe the pattern formation and note whether the price breaks above or below the pattern.
7. **Descending Triangle:**

Symmetric Triangle:

Flag Pattern:

Pennant Pattern:

Head and Shoulders Pattern:

Cup and Handle Pattern:

WEEK-12

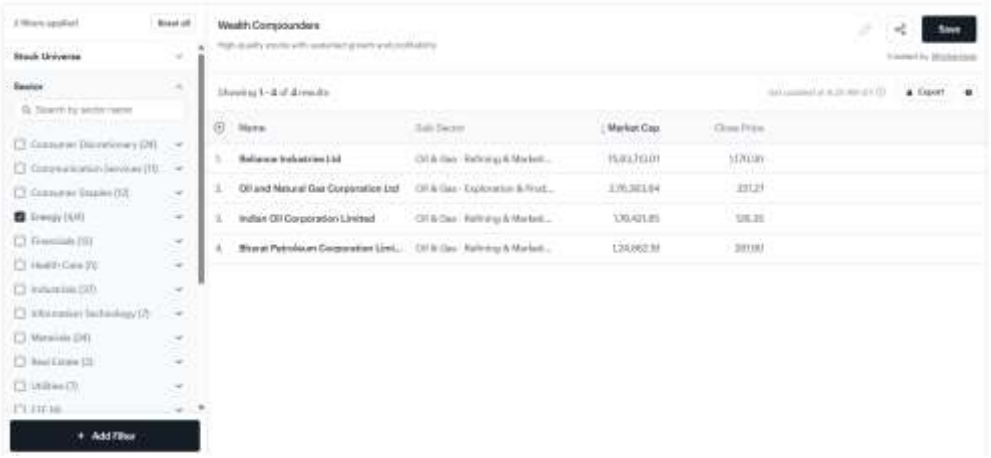

1. Identify subsectors in tickertape.in with respect to market cap and close price commonly used moving averages, Alligator Indicator in chartink.com

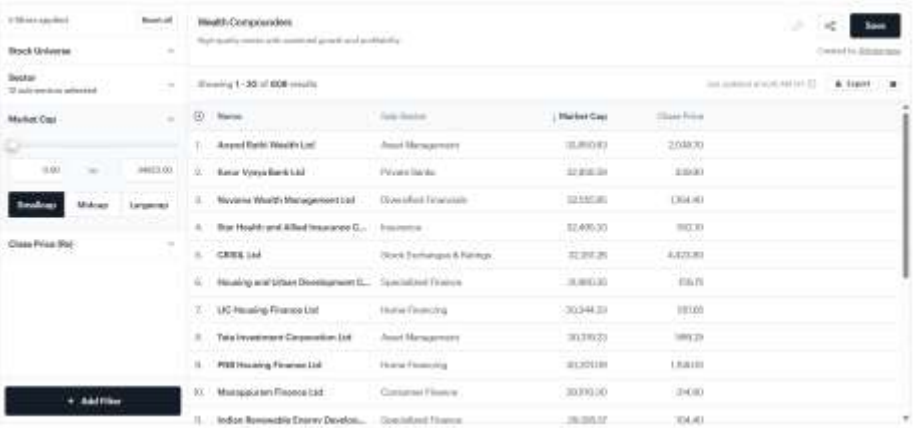

Subsectors:

1. Open https://www.tickertape.in/ and navigate to the **Stocks** section or stock screener.
2. Explore the available sectors and subsectors.
3. Apply the market capitalization filter to identify large-cap, mid-cap and small-cap companies.
4. Select companies from different subsectors within each category.
5. Record the company name, subsector, market capitalization and closing price.
6. Compare closing prices and market capitalization across the selected companies and subsectors.

Showing 1 - 8 of 8 results

	Name	Sub-Sector	↓ Market Cap	Close Price
1.	Adani Ports and Special Economic ...	Ports	4,05,727.20	1,761.00
2.	Adani Power Ltd	Power Generation	3,64,460.73	189.00
3.	Shriram Finance Limited	Consumer Finance	2,21,296.05	940.45
4.	Solar Industries India Limited	Commodity Chemicals	1,80,980.11	20,000.00
5.	Torrent Pharmaceuticals Ltd	Pharmaceuticals	1,77,133.51	4,656.90
6.	Cummins India Ltd	Industrial Machinery	1,33,887.60	4,830.00
7.	BSE Ltd	Stock Exchanges & Ratings	1,33,887.35	3,267.20
8.	GE Vernova T&D India Ltd	Heavy Electrical Equipments	1,07,396.16	4,194.40

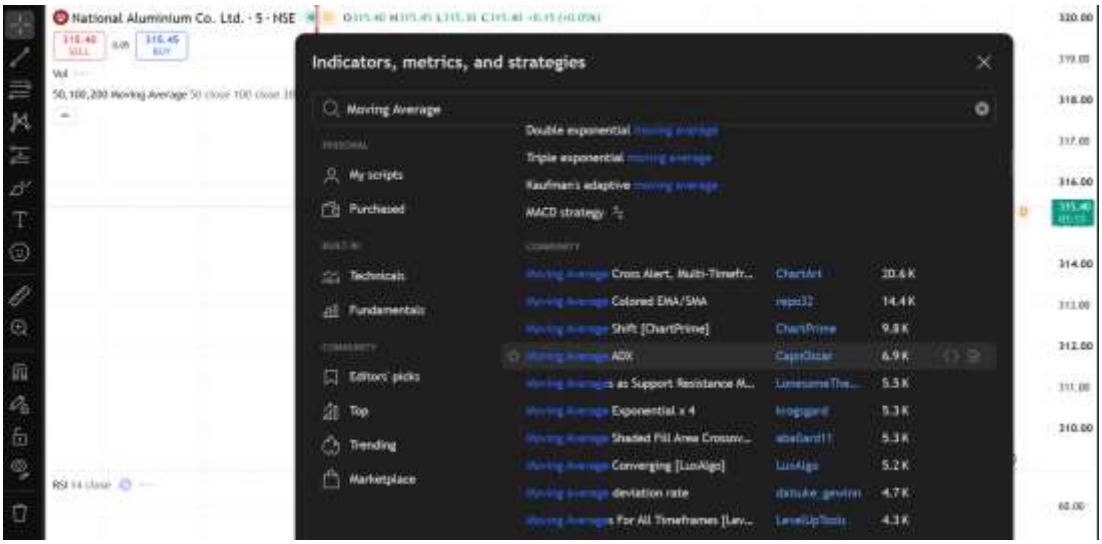

Commonly Used Moving Averages and Alligator Indicator:

1. Open https://chartink.com/ and navigate to the stock screener.
2. Open a stock chart and select a company for technical analysis.
3. Identify commonly used moving averages, such as:

   20-day moving average, 50-day moving average, 100-day moving average, 200-day moving average

4. Observe how the moving averages relate to the stock's price and to one another.

5. Locate the **Alligator Indicator**, if available, or use a compatible charting platform that supports it.
6. Identify the three Alligator lines:
   - **Jaw:** 13-period smoothed moving average, shifted 8 bars forward.
   - **Teeth:** 8-period smoothed moving average, shifted 5 bars forward.
   - **Lips:** 5-period smoothed moving average, shifted 3 bars forward.
7. Observe whether the lines are intertwined during consolidation or separated during a trend.

WEEK-13

1. Study the Fear and Greed Indicator, Moving Averages, Ichimoku Indicator, Fibonacci Indicator, RSI Indicator, Stochastic Indicator, MACD Indicator, VMWA Indicator and Wyckoff Trading Methodology.

Procedure

1. Open a stock charting platform and select a stock for analysis.
2. Apply the **Fear and Greed Indicator** and observe market sentiment.

3. Add **Moving Averages Crossover** (9, 21) and observe price crossovers.

4. Apply the **Ichimoku Indicator** and examine price movement relative to the cloud.

5. Use the **Fibonacci Indicator** to identify retracement levels and potential support or resistance.

6. Apply **RSI** and **Stochastic** indicators to observe overbought and oversold conditions.

7. Add **MACD** and observe line crossovers and histogram movements.

8. Apply the **VWMA Indicator**, where available, and examine its signals.

9. Study the **Wyckoff Trading Methodology** by identifying possible accumulation, distribution and breakout phases using price and volume.
